FREE IDENTITY EXPOSURE ASSESSMENT

Discover, prioritize and validate identity exposure

SAPORO
ORDER IN CHAOS

Find the identity exposures that put you at risk

Analysis performed in 1 hour or less

Reveal how identity exposures create real attack opportunities across your environment – map attacker movement, identify high-impact weaknesses, and get a prioritized action plan.

Get started with a Saporo assessment to significantly reduce your identity exposure

---

Most teams don't know which of their identity exposures can actually reach critical assets.
The assessment tells you – **in under a day**

✓ HOW *IT RUNS*

1

Deploy

UNDER 1 HOUR

Agentless, read-only collector is deployed on-premise or in your cloud with scoped service identities

2

Analyse

WE DO THE WORK, CO-LED BY YOUR TEAM

Reachable identity exposures analysis in your environment – no payload, no exploit simulation, no production impact

3

Report

SAME DAY

Deliverables include live identity risk graph, prioritized findings, remediation backlog, and executive summary

✓ WHAT *YOU WALK AWAY WITH*

SCOPE

View your attack surface across your entire hybrid environment

- Unified view of every identity, permission, and relationship across on-prem and cloud.
- On-premise across AD, ADCS, SMB FileShares & Winlocal.
- Cloud across Azure, Entra ID, M365 & more.

Get full visibility with zero blind spots

DISCOVER

Reveal all exposures that can reach critical assets

- Map of identity attack paths that lead to your most critical assets – before an attacker does.
- 600+ security controls from ANSSI, MITRE, CIS frameworks & more.
- Compliance gaps against NIS2, SOC2 and ISO27001 requirements.

Get a CISO-ready exposure assessment

PRIORITIZE & VALIDATE

Focus on what reduces risk most before attackers exploit it

- A ranked findings list to reduce risk accurately and efficiently.
- Exploitability validation of all findings across the whole attack surface.
- Clear evidence behind every finding, so your team knows why it matters.

Get a pre-validated remediation plan

> *"Saporo offers a unique real-time view of both misconfigurations from different frameworks like ANSSI and attack paths evolution enabling our teams to improve our AD security much faster and with less resources."*
>
